

*Preliminary Amendment*  
*U.S. Ser. No. 10/708,338*

APPENDIX

Claims added by this Preliminary Amendment:

50. (New) A method to inject fluid into a well, the method comprising:  
installing a string of production tubing, the string of production tubing including a well tool;  
hanging a lower hydraulic conduit from a distal end of the well tool;  
deploying an upper hydraulic conduit from a surface station through the production tubing to a location immediately above the well tool;  
establishing a flow path between the upper hydraulic conduit and the lower hydraulic conduit through the well tool, the flow path configured to not restrict the operation of the well tool;  
injecting the fluid from the surface station through the upper hydraulic conduit, the flow path, and the lower hydraulic conduit to a location below the well tool.
51. (New) The method of claim 50 wherein the well tool is retrievable with the string of production tubing.
52. (New) The method of claim 50 wherein the well tool is a subsurface safety valve.
53. (New) The method of claim 50 wherein the flow path retracts from the well tool when not in use.
